

Product Requirements Document

Target release	1 st Jan 2027
EPIC	Monetization Features For WhatsApp
Document status	DRAFT
Document owner	Jaya Dev
Developer	Sanjay
Designer	Rupak
Tech lead	Nagesh
QA	Audhansu

Problem Statement

WhatsApp wants to add monetization features in a B2C format, leveraging its huge customer base while staying true to what makes it unique.

Objective

The core objective of this initiative is to generate robust revenue through B2C streams while retaining the existing user base and enhancing the app's functionality. The plan involves introducing five monetization features focused on increasing the app's utility and improving user retention.

Solution

As WhatsApp offers two applications—WhatsApp Messenger and WhatsApp Business—our proposed solutions will cover both platforms. However, certain features will be unlocked for wider accessibility, while others will remain locked to maintain exclusivity and drive monetization.

1. Paid Channel Subscription

We can help creators build **paid channels** where they can share their content based on specific topics — such as **politics, cooking, or designing** — according to their subscription plans and audience interests. Creators can **monetize** their channels based on the number of viewers and engagement. Additionally, we can provide a **mentorship feature** — allowing users to reach out to particular mentors for **career guidance** or **knowledge sharing**.

Integration with **WhatsApp** and **WhatsApp Business** will help creators directly communicate with their subscribers or mentors, send updates, and share content links conveniently.

2. Google Calendar Integration

On an urgent basis, meetings can be arranged and invites shared directly — removing the need for separate WhatsApp calls.

Before each call, a **notification** will be sent, and the meeting can be linked with **WhatsApp Cloud API**, enabling document sharing and recording options.

The system will be optimized for **low bandwidth**, supporting both **audio/video calls** and **webinar arrangements** through WhatsApp or WhatsApp Business.

3. Advanced Business Tool

Develop a new **business engagement platform** for:

- **Dropshipping services**
- **Digital product sales**
- **Affiliate marketing**
- The platform will also integrate **Gen AI tools** for higher productivity, including:
 - Text-to-video conversion
 - Instant presentation (PPT) creation
 - Story and cartoon generation tools
- Users can share these outputs directly via **WhatsApp** and **WhatsApp Business**, enhancing collaboration and communication.

4. Money Transaction Platform

Create a **digital payment system** that supports **UPI transactions** and other **money transfers**.

After each transaction, users can receive **reward points** or **cashback offers**, encouraging repeated use. Integration with **WhatsApp Pay** and **WhatsApp Business Payments** can make the process more seamless and trustworthy.

5. E-commerce Platform

Develop an **e-commerce platform** where **local and external sellers** can list and sell their products in one unified marketplace.

It will include a **quick delivery process** and integrate both **WhatsApp** and **WhatsApp Business** for:

- Order updates
- Customer queries
- Payment confirmations
- After-sales support
- This integration will enhance user engagement and trust in the buying process.

Current Market Analysis

User Statistics

Normal WhatsApp:

- **User Base:** 2.8 **billion** active users.
- **Purpose:** Used for **personal communication**.
- **Engagement:** Users spend about **38 minutes/day**.
- **Demographics:** Dominates the **18–44 age group**.

WhatsApp Business:

- **User Base:** **400 million** active users. (*Not billion*)
- **Purpose:** Focuses on **brand–customer interaction**.
- **Engagement:** Users spend about **20–25 minutes/day**.
- **Demographics:** Dominates the **25–45 age group**.

Usage Statistics

Normal WhatsApp:

- **Frequency:** Users open the app **20–25 times a day**.
- **Messages Sent:** Users send an average of **60–70 messages/day**.
- **Messages Received:** Users receive around **80–100 messages/day**.
- **Call Usage:** Users make **3–5 voice/video calls daily**.
- **Peak Activity:** Usage peaks during **evening hours**.

WhatsApp Business:

- **Frequency:** Users check the app **8–10 times daily** for client communication.
- **Messages Sent:** Send around **25–30 messages/day**, mostly transactional.
- **Messages Received:** Receive **40–50 messages/day**, often from customers or inquiries.
- **Call Usage:** Business users make **1–2 client calls daily**.
- **Peak Activity:** Usage peaks during **working hours (10 AM–6 PM)**.

Competitor Analysis:

Telegram

- **Monthly Active Users (MAU):** ~1 billion
- **Annual Revenue (latest):** \$1 billion + (2024, rising in 2025)
- **Average Revenue Per User (ARPU):** ~\$1.47 per year (~\$0.12 per month)

Signal

- **Monthly Active Users (MAU):** ~70–100 million
- **Reported Revenue (2024):** ~\$29–\$30 million
- **ARPU:** Not applicable (~<\$1/year if estimated)

Facebook Messenger

- **Monthly Active Users (MAU):** ~947 M to ~1 B+ globally
- **Revenue (Direct):** ~\$1.9 M (from in-app sources)
- **Revenue Contribution:** Part of Meta's total ad revenue (~\$164.5 B in 2024)
- **ARPU:** Not disclosed separately (combined under Meta's overall ARPU)

Current Market Potential

1) Paid Channel Subscription / Creator Economy

Market Focus: Creator monetization platforms, paid subscriptions, digital content ecosystem

- **Market Size (2025):** ~USD 253 B globally (creator economy overall)
- **Market Forecast (2030):** ~USD 749 B globally (creator economy)
- **CAGR (2025–2030):** ~25–26%

Note: The creator economy includes subscription-based content platforms, channels, and direct monetization tools — so this is a strong indicator of potential for your Paid Channel Subscription feature.

2) Google Calendar Integration / Productivity Software (Business Productivity)

Market Focus: Productivity software including calendars, collaboration, scheduling, remote work tools

- **Market Size (approximation for productivity management software in 2025):** ~USD ~60 B+ (estimated global size early-2020s)
- **Market Forecast (2030):** ~USD 150 B globally
- **CAGR (2025–2030):** ~14%

Interpretation: While not a single standalone product category like e-commerce or payments, productivity software (which includes calendar integration, scheduling tools, collaboration apps, etc.) is a large and growing addressable market — driven by enterprise digital transformation.

3) Advanced Business Tool (Business SaaS / Cloud Tools)

Market Focus: Cloud-based SaaS tools for CRM, business automation, analytics, AI productivity, etc.

- **SaaS Industry (approx):** projected to grow from ~USD 280B+ in the mid-2020s to ~USD 774B by 2030 (SaaS software broadly, not niche)
- **Applicable Sub-segment:** Business productivity and cloud office suites are part of this broader SaaS growth trend.
- **CAGR (SaaS & productivity combined):** ~14–25% across different SaaS segments, depending on sub-segment specifics (office productivity, collaboration, etc.)

Interpretation: Your advanced business tools sit within the broader SaaS & productivity segment, which is forecast for robust growth through 2030.

4) Money Transaction Platform (Digital Payments & UPI-like Services)

Market Focus: Digital payments, fintech, UPI infrastructure, payment gateways

- **Digital Payment Market (2025 estimated): ~USD 137 B** (2025 est.)
- **Digital Payment Market (2030 forecast): ~USD 361 B**
- **CAGR (2025–2030): ~21.4%**

India UPI Market (strong regional component): expected to expand rapidly with a projected **~46% CAGR** from 2025 to 2030 (India UPI infrastructure segment).

Interpretation: Digital payments and fintech tools represent one of the fastest-growing categories, driven by global adoption of cash-less payments and business payment solutions.

5) E-commerce Platform

Market Focus: Online marketplaces and commerce platforms

- **Global eCommerce platform market (2025): ~USD 9.08 B** (platform software niche)
- **Global eCommerce platform forecast (2030): ~USD 16.5 B**
- **CAGR (2025–2030): ~12.7%**

India eCommerce (as example of end-market):

- **2025: ~USD 137 B**
- **2030 forecast: ~USD 363 B**
- **CAGR (2025–2030): ~21.5%**

Interpretation: The e-commerce software or platform segment (tools for sellers) exhibits healthy growth, while overall commerce demand (India example) shows even stronger growth due to consumer adoption.

Summary Table

Feature	Market Size (2025)	Market Forecast (2030)	Forecast CAGR (2025–2030)
Paid Channel Subscription / Creator Economy	USD 253 B	USD 749 B	25%+
Calendar/ Productivity Tools	USD 60 B+	USD 150 B	14%
Advanced Business Tools / SaaS	USD 280 B+ (broad SaaS)	USD 774 B (SaaS)	14%-25%
Money Transaction / Digital Payments	USD 137 B	USD 361 B	21.4%
E-commerce Platform	USD 9.08 B (software) / e-commerce \$137B India	USD 16.5 B (software) / e-commerce \$363B India	12.7% (software) / 21.5% India e-commerce

Success Metrics Framework for Integrated WhatsApp Business Features

Feature	Primary Objective	Key Success Metrics (KPIs)
Paid Channel Subscription	Enable content creators & businesses to monetize their niche content.	- Number of paid channels created - Subscription conversion rate (%) - Average Revenue per Creator (ARPC) - Monthly Active Paid Creators (MAPC) - Retention Rate of subscribers
Calendar + Meeting + Cloud Integration	Improve productivity & scheduling efficiency for businesses.	- Meetings scheduled per user per month - Meeting completion rate (%) - Average duration of meetings - Calendar-to-meeting conversion rate - % users using WhatsApp meeting integration
Advanced Business & GenAI Tools	Enhance productivity and digital enablement for SMBs and creators.	- Daily Active Users of AI tools - Feature utilization rate (%) - Avg time saved per task (minutes) - New business accounts created using AI - Tool satisfaction (CSAT > 80%)
Money Transaction & Rewards Platform	Encourage digital transactions and drive user retention through incentives.	- Monthly Transaction Volume (MTV) - Active transaction users (MAU) - Avg reward/cashback redemption rate (%) - Repeat transaction rate (%) - Transaction success rate (%)
E-Commerce Marketplace	Build a unified platform for SMEs to sell locally and globally.	- GMV (Gross Merchandise Value) - Active Sellers & Buyers - Repeat Purchase Rate (%) - Commission Revenue per Seller - Delivery satisfaction (NPS)

Assumptions

1. Paid Channel Subscription

- Assume 3–5% of WhatsApp Business users will adopt paid content channels for monetization.
- Average annual subscription price: **\$19.99 per creator**.
- Adoption driven by rising creator economy demand and direct audience engagement needs.

2. Google Calendar Integration

- Assume 8–10% of WhatsApp Business users need built-in scheduling and meeting tools.
- Integration improves productivity by reducing dependency on external apps (Google Meet/Zoom).
- Revenue generated via **premium feature access (\$24.99/year)** for advanced scheduling and recording.

3. Advanced Business Tool (GenAI Productivity Suite)

- Assume 5% of SMB users will upgrade to use AI-powered productivity tools.
- Each user pays **\$49.99/year** for access to text-to-video, instant PPT, and AI story creation tools.
- Adoption driven by the global trend toward automation and digital transformation.

4. Money Transaction Platform

- Assume 1–2% of users will use integrated UPI/payment tools for business transactions.
- Revenue generated from small fees, reward partnerships, or cashback campaigns (~\$3/user/year).
- Adoption influenced by UPI growth and India's shift toward cashless digital payments.

5. E-commerce Platform

- Assume 8–10% of business users will sell through the in-app marketplace.
- Platform earns **2% commission per transaction**, plus premium listing fees.
- Adoption driven by convenience, WhatsApp integration, and local-to-global reach potential.

Project Milestones – Integrated WhatsApp Business Platform

Quarter 1 – Foundation & MVP Setup

- Finalize feature architecture, user stories, and success metrics for all modules.
- Complete UX/UI design system and clickable prototype for end-to-end user flow.
- Develop MVP for core features — **Paid Channel Subscription, Calendar Integration, and UPI setup**.
- Conduct internal QA + closed beta testing with a limited set of business users.

Quarter 2 – Product Expansion & AI Integration

- Integrate **Advanced Business Tools (GenAI)** — text-to-video, PPT, and story creation.
- Launch **Money Transaction Platform** with reward system and WhatsApp Pay support.
- Add analytics dashboards for creators, sellers, and business users.
- Begin regional pilot launches and collect performance feedback for feature refinements.

Quarter 3 – Marketplace & Monetization Scale-up

- Launch full **E-commerce Platform** with seller onboarding, catalog listing, and quick delivery API.
- Enable **Creator Commerce** for direct product tagging and affiliate sales.
- Introduce monetization dashboards across all features (channels, AI tools, marketplace).
- Scale up marketing, onboarding, and partnerships with mentors, creators, and SMBs.

Quarter 4 – Optimization & Global Rollout

- Analyze data from all modules — refine UX, optimize performance, and improve AI accuracy.
- Launch **global version** integrating Paid Channels, E-commerce, and Payments seamlessly via WhatsApp Business API.
- Initiate growth campaigns targeting **international SMBs and creator networks**.
- Prepare roadmap for **Version 2.0** — focusing on automation, personalization, and AI-driven insights.

Whatsapp Feature Road MAP

Requirements

1. Paid Channel Subscription

- **Backend Infrastructure:** Secure subscription management system (pricing tiers, renewals, user authentication).
- **Creator Dashboard:** Analytics for revenue, subscriber count, and engagement tracking.
- **WhatsApp Integration:** Channel creation, message automation, and exclusive content sharing via WhatsApp API.

2. Google Calendar Integration

- **API Integration:** Sync with Google Calendar, Outlook, and internal scheduling APIs.
- **Meeting Management:** Backend for creating, modifying, and recording meetings (audio/video).
- **Notification System:** WhatsApp Cloud API integration for reminders, invites, and calendar alerts.

3. Advanced Business Tool (GenAI Productivity Suite)

- **AI Model Integration:** Connect APIs for text-to-video, instant PPT, and story/cartoon generation (e.g., OpenAI, Runway).
- **Data Storage:** Secure file handling (AWS/Firebase) for generated assets and exports.
- **User Interface:** Simple dashboard for AI tool access and one-click WhatsApp sharing.

4. Money Transaction Platform

- **Payment Gateway & UPI API:** Integration with providers like Razorpay, Stripe, or NPCI UPI.
- **Rewards & Cashback Engine:** Points tracking, redemption logic, and user wallet.

- **Security & Compliance:** Encryption (PCI DSS), fraud detection, and transaction logs.

5. E-commerce Platform

- **Product & Seller Module:** Product listing, inventory, and pricing management system.
- **Order & Delivery Management:** Integration with logistics APIs (Delhivery, Shiprocket) and payment verification.
- **WhatsApp Business API:** Real-time order updates, chatbot-based support, and invoice sharing.

User Stories:

Epic 1 - Paid Channel Subscription

Title	User Story	Priority Estimation		Description
Create Paid Channel	As a <i>creator</i> , I want to create a paid channel so that I can share exclusive content with subscribers.	High	8	Builds the foundation for channel setup, pricing, and content access control.
Manage Subscription Plans	As a <i>creator</i> , I want to offer multiple pricing tiers so that I can attract different audience segments.	High	5	Allows flexible monthly/yearly plans with dynamic pricing.
Analytics Dashboard	As a <i>creator</i> , I want to track revenue and engagement so that I can measure channel performance.	Medium	5	Displays subscriber growth, churn, and earnings metrics.
Subscribe & Payment	As a <i>user</i> , I want to subscribe to a channel easily so that I can access exclusive content.	High	8	Integrates with payment gateways and automates access permissions.
WhatsApp Notification	As a <i>creator</i> , I want to notify my subscribers via WhatsApp so that I can increase engagement.	High	3	Uses WhatsApp Business API to push content updates and alerts.
Mentor Connect	As a <i>user</i> , I want to connect with topic mentors so that I can seek expert guidance.	Medium	5	Adds mentor profiles, chat options, and scheduling support.
Channel Review System	As a <i>subscriber</i> , I want to rate channels so that others can identify valuable creators.	Low	3	Enables 1–5 star rating and comment moderation.

Epic 2 - Google Calendar Integration

Title	User Story	Priority Estimation		Description
Schedule Meeting	As a <i>user</i> , I want to schedule meetings with clients so that I can plan my day efficiently.	High	5	Enables meeting creation with title, time, and participants.
Calendar Sync	As a <i>user</i> , I want to sync with Google Calendar so that I can avoid duplicate events.	High	8	Integrates Google Calendar API for automatic updates.
Send Meeting Invites	As a <i>host</i> , I want to send invites through WhatsApp so that attendees get reminders.	High	3	Sends meeting links and reminders via WhatsApp Cloud API.
Meeting Recording	As a <i>participant</i> , I want to record sessions so that I can revisit them later.	Medium	5	Stores meeting files securely in the cloud.
Reminders & Alerts	As a <i>user</i> , I want pre-meeting notifications so that I don't miss important sessions.	High	2	Sends in-app and WhatsApp push alerts 10–30 minutes before.

Title	User Story	Priority	Estimation	Description
Low Bandwidth Optimization	As a <i>remote user</i> , I want audio-only fallback so that I can attend with poor internet.	Medium	5	Auto-switches to audio stream when bandwidth drops.
Post-Meeting Notes	As a <i>participant</i> , I want AI-generated summaries so that I can focus on discussion.	Medium	5	Uses GenAI to create meeting notes and transcripts.

Epic 3 - Advanced Business Tool (GenAI Productivity Suite)

Title	User Story	Priority	Estimation	Description
Text-to-Video Generator	As a <i>creator</i> , I want to turn my script into a video so that I can post content faster.	High	8	Uses GenAI APIs to generate short-form videos from text prompts.
Instant PPT Creator	As a <i>marketer</i> , I want to generate presentation slides instantly so that I save time.	High	5	Converts text input into editable PowerPoint decks.
AI Story/Cartoon Builder	As a <i>designer</i> , I want to create story-based graphics so that I can engage my audience.	Medium	5	Generates storyboards, characters, and dialogue automatically.
AI Writing Assistant	As a <i>user</i> , I want to create summaries and blogs so that I can automate writing tasks.	High	5	Adds AI-based writing tool for quick content generation.
File Storage & Export	As a <i>user</i> , I want to save and export AI outputs so that I can reuse them later.	High	3	Saves files to cloud (AWS/Firebase) with one-click export.
Share via WhatsApp	As a <i>user</i> , I want to share AI-generated outputs on WhatsApp so that I can collaborate easily.	High	3	Adds “Share to WhatsApp” button for documents/videos.
Usage Analytics	As an <i>admin</i> , I want to monitor tool usage so that I can track adoption and system load.	Medium	5	Collects usage metrics and displays adoption trends.

Epic 4 - Money Transaction Platform

Title	User Story	Priority	Estimation	Description
UPI Integration	As a <i>business owner</i> , I want to accept UPI payments so that I can receive money easily.	High	8	Connects with NPCI or Razorpay APIs for instant payments.
Transaction Dashboard	As a <i>user</i> , I want to view all my transactions so that I can track finances.	High	5	Displays daily, weekly, and monthly summaries.
Reward Points	As a <i>user</i> , I want to earn reward points on each transaction so that I feel incentivized.	Medium	3	Implements reward logic linked with transactions.
Cashback Redemption	As a <i>user</i> , I want to redeem my rewards for cash or discounts so that I can save money.	Medium	5	Converts points to usable wallet balance.
Payment Confirmation	As a <i>user</i> , I want real-time transaction alerts so that I know payment success instantly.	High	2	Uses WhatsApp API for instant confirmation messages.
Transaction Security	As a <i>user</i> , I want secure authentication so that my funds are protected.	High	5	Adds encryption, 2FA, and anti-fraud monitoring.
Multi-Currency Support	As a <i>global user</i> , I want to send/receive payments in different currencies.	Low	8	Adds currency conversion and international support.

Epic 5 - E-commerce Platform

Title	User Story	Priority	Estimation	Description
Seller Registration	As a <i>seller</i> , I want to register my business so that I can start selling products.	High	5	Includes KYC verification and business setup form.
Product Listing	As a <i>seller</i> , I want to upload products with details so that customers can find them.	High	8	Enables bulk uploads with photos, price, and stock management.
Order Management	As a <i>seller</i> , I want to manage orders and inventory so that I can fulfill efficiently.	High	5	Tracks order lifecycle and updates inventory automatically.
WhatsApp Chat Support	As a <i>buyer</i> , I want to message sellers for queries so that I can buy confidently.	High	3	Integrates WhatsApp chat and automated responses.
Payment Gateway	As a <i>buyer</i> , I want a secure checkout process so that I can pay safely.	High	5	Integrates multiple payment options including UPI, cards, wallets.
Quick Delivery Tracking	As a <i>buyer</i> , I want to track my shipment so that I know my order status.	Medium	5	Integrates logistics APIs (Delhivery, Shiprocket).
Reviews & Ratings	As a <i>buyer</i> , I want to rate my purchase so that others know product quality.	Medium	3	Adds review module with moderation and average rating.

Non-Functional Requirements (NFRs)

1. Performance

- The system should support **up to 10 million concurrent users** without noticeable latency.
- All pages, dashboards, and chat interfaces should **load within 3 seconds** under normal network conditions.
- AI content generation and transactions must **process within 5–7 seconds** of user action.

2. Security

- All communications must use **end-to-end encryption (SSL/TLS 1.3)** to protect user data.
- The system must comply with **GDPR and RBI/PCI-DSS** guidelines for payments and data protection.
- Implement **role-based access control (RBAC)** and **two-factor authentication (2FA)** for all admin and business accounts.

3. Scalability

- Architecture should be **cloud-native and horizontally scalable** (AWS/Firebase/Kubernetes).
- APIs and microservices should support **auto-scaling** during high-traffic periods (e.g., sale events, webinars).
- Database architecture must be designed for **multi-tenant use**, supporting multiple businesses on one instance.

4. Reliability & Availability

- The platform should maintain **99.9% uptime** for all critical services.
- Automatic **failover and disaster recovery** must be implemented to prevent service downtime.
- All transactions and meeting data should be **backed up every 24 hours** in secure cloud storage.

5. Usability

- UI must be **mobile-first and responsive**, optimized for both Android and iOS WhatsApp users.
- The system should maintain a **consistent UX** across all modules (Channels, AI tools, E-commerce).
- Accessibility compliance with **WCAG 2.1** to ensure inclusivity for differently-abled users.

6. Maintainability

- Codebase must follow **modular, microservice architecture** with clear documentation.
- CI/CD pipelines should enable **zero-downtime deployments** and version rollbacks.
- All components should be **unit tested (≥80% coverage)** before release.

Open Questions

Open Question	Recommended	Owner	Required Answer / Action
What subscription tiers should Paid Channel offer (monthly, yearly, freemium)?	Conduct competitor analysis and survey creators.	Product Manager	Define 2–3 subscription plans, pricing, and features per tier.
How will WhatsApp notifications for Paid Channel be personalized?	Decide on frequency, tone, and content type.	UX Designer / Dev	Finalize notification templates and automation rules.
Should Google Calendar Integration allow recurring meetings?	Evaluate user need and technical feasibility.	Product Manager / Dev	Confirm support for recurring events, reminders, and rescheduling.
How should AI-generated content (Advanced Business Tool) handle copyright & ownership?	Consult legal & policy teams.	Legal / Product	Define ownership rules, licensing, and user agreement updates.
What is the maximum file size for AI outputs (video, PPT, images)?	Set limits to balance performance and user experience.	Dev / Product	Finalize max upload/download size and storage policies.
Should Money Transaction Platform support multiple currencies?	Analyze target markets & UX impact.	Product Manager	Decide whether to allow INR only or multi-currency support.
What is the reward/cashback logic for Money Transaction Platform?	Define percentage, tiers, and validity.	Product Manager / Finance	Specify rules for cashback calculation, points expiry, and redemption.

Open Question	Recommended	Owner	Required Answer / Action
How will seller verification work on E-commerce Platform?	Define KYC/AML requirements.	Compliance / Product	List required documents and verification workflow.
Should E-commerce support multiple payment options beyond UPI (cards, wallets)?	Check technical feasibility & market needs.	Product Manager / Dev	Finalize supported payment modes.
How will order returns/refunds be handled in the platform?	Create workflow including approval, notification, and refund timeline.	Product Manager / Customer Support	Document return policy and automated workflow.
Should users be able to share AI content and E-commerce products via WhatsApp directly?	Determine privacy & API feasibility.	Dev / UX Designer	Confirm integration scope & message templates.
How will analytics dashboards be displayed for creators, sellers, and users?	Decide key metrics and visualization style.	Product Manager / UX Designer	Define KPIs, charts, and reports for each user type.
What's the expected SLA for system response for AI generation & payments?	Set performance targets.	Dev / Product	Define max acceptable latency for content generation and payment confirmation.
How to handle offline scenarios for payments or AI tools?	Plan caching, retries, or notifications.	Dev	Specify offline behavior and error messages.
How will user feedback be collected and acted upon across all modules?	Decide feedback channel & frequency.	UX / Product	Define feedback mechanism and tracking process for continuous improvement.

Out of Scope – Platform Features

Feature / Module	Out of Scope Items	Reason / Note
Paid Channel Subscription	- Automated content translation for multiple languages - In-app social media sharing beyond WhatsApp	To focus on MVP creator-monetization via WhatsApp only
Google Calendar Integration	- Integration with other calendar apps (Outlook, iCloud) - AI-based scheduling suggestions	MVP focuses on Google Calendar + WhatsApp notifications only
Advanced Business Tool (GenAI Productivity Suite)	- Complex video editing beyond AI-generated templates - Enterprise-grade team collaboration (multi-user editing)	Focus on single-user AI content generation for MVP
Money Transaction Platform	- Bank account linking for every international bank - Advanced financial reporting & taxation modules	MVP limited to UPI/Wallet transactions & basic rewards only
E-commerce Platform	- Multi-country logistics & customs handling - Full-scale marketplace for enterprise sellers - Advanced AI recommendation engine	MVP targets local sellers and buyers with simplified delivery & payments

Feature / Module	Out of Scope Items	Reason / Note
Cross-Feature Scope	• Full offline functionality across features • 3rd-party plugin integrations beyond WhatsApp Cloud API	To reduce complexity in MVP and ensure faster launch

Risk and Mitigation Strategies

Launch Checklist

Phase	Task	Confirmation / Status
Planning & Design	Finalize feature requirements & user stories for all modules	✔ Completed / ☐ Pending
	Complete UI/UX mockups & prototype approval	✔ Completed / ☐ Pending
	Confirm open questions resolved (subscription tiers, reward logic, API limits)	✔ Completed / ☐ Pending
Development	Implement Paid Channel Subscription module (creator onboarding, payment integration, WhatsApp notifications)	✔ Completed / ☐ Pending
	Implement Google Calendar Integration (scheduling, reminders, rescheduling)	✔ Completed / ☐ Pending
	Implement Advanced Business Tool (AI content generation, previews, sharing, WhatsApp integration)	✔ Completed / ☐ Pending
	Implement Money Transaction Platform (payments, rewards, UPI/Wallet integration, transaction logs)	✔ Completed / ☐ Pending
	Implement E-commerce Platform (product listing, catalog, checkout, delivery tracking)	✔ Completed / ☐ Pending
Testing & QA	Unit testing of all modules	✔ Completed / ☐ Pending
	Integration testing between modules & APIs (WhatsApp, Google Calendar, Payment Gateway)	✔ Completed / ☐ Pending
	Load testing & performance optimization	✔ Completed / ☐ Pending

Risk	Impact	Probability	Mitigation Strategy
Paid Channel Subscription – Low adoption by creators	Revenue shortfall	Medium	Conduct early creator surveys, offer incentives, provide onboarding support & tutorials.
Paid Channel Subscription – Payment failures / subscription lapses	Revenue loss, poor UX	Medium	Integrate reliable payment gateways, provide retry options, send WhatsApp reminders.
Google Calendar Integration – Sync errors / missed notifications	User dissatisfaction, meeting no-shows	Medium	Use reliable Google Calendar APIs, implement error logging & fallback notifications via WhatsApp.
Advanced Business Tool – AI output quality issues (irrelevant or low-quality content)	User frustration, churn	High	Implement prompt validation, provide editable previews, allow regeneration, collect user feedback for AI tuning.
Advanced Business Tool – Copyright / IP issues for generated content	Legal exposure	Medium	Define clear ownership policies, include disclaimers, consult legal team.
Money Transaction Platform – Failed or delayed payments	User dissatisfaction, trust issues	Medium	Integrate multiple payment gateways, provide instant failure alerts, retries, and reconciliation process.
Money Transaction Platform – Fraud / unauthorized transactions	Financial loss, legal exposure	High	Implement 2FA, OTP verification, transaction limits, AI-based fraud detection, and monitoring.
Money Transaction Platform – Reward / cashback abuse	Revenue leakage	Medium	Set redemption limits, audit reward activity, implement anti-abuse logic.
E-commerce Platform – Seller verification failures	Fake listings, reputational risk	Medium	Define KYC workflow, implement automated & manual verification, reject suspicious sellers.
E-commerce Platform – Order delivery delays	Buyer dissatisfaction, complaints	Medium	Integrate reliable logistics APIs, real-time tracking, automated notifications via WhatsApp.
E-commerce Platform – Payment disputes / refunds	Operational overhead	Medium	Automated dispute management, WhatsApp alerts, clear refund policies.
Cross-Feature – System downtime / server overload	Service unavailability	High	Implement scalable cloud infrastructure, load balancing, monitoring, and disaster recovery plans.
Cross-Feature – Data privacy / compliance issues	Legal penalties, user trust loss	Medium	Encrypt sensitive data, comply with GDPR/India Data Protection laws, maintain audit logs.
Cross-Feature – WhatsApp API limitations / throttling	Notifications may fail	Medium	Implement queuing, retry logic, and fallback email notifications if needed.
Cross-Feature – User adoption lower than projected	Revenue & engagement impact	Medium	Run targeted marketing campaigns, onboarding support, and promotional trials.

Phase	Task	Confirmation / Status
	Security testing (encryption, 2FA, fraud detection)	✔ Completed / ☐ Pending
	User acceptance testing (UAT) with beta users	✔ Completed / ☐ Pending

Phase	Task	Confirmation / Status
Pre-Launch Setup	Set up production environment & servers	✔ Completed / ☐ Pending
	Configure WhatsApp Cloud API & payment gateways for production	✔ Completed / ☐ Pending
	Prepare admin dashboards & monitoring tools	✔ Completed / ☐ Pending
	Finalize support workflow (refunds, disputes, content issues)	✔ Completed / ☐ Pending
Launch	Soft launch / Beta release	✔ Completed / ☐ Pending
	Monitor system performance, logs, and notifications	✔ Completed / ☐ Pending
	Collect initial user feedback	✔ Completed / ☐ Pending
Post-Launch	Implement fixes & updates based on feedback	✔ Completed / ☐ Pending
	Launch marketing campaigns & user onboarding	✔ Completed / ☐ Pending
	Continuous monitoring of KPIs, adoption, and revenue	✔ Completed / ☐ Pending
